Progressive Outline Mixed Demo

2-Level Mapping vs 3-Level Content

Presentate Team | 2026-01-18

Sommaire

1 Introduction 3
2 1. Mapped Section (L1) 7
2.1 1.1 Mapped Subsection (L2) 10

1 Introduction

About Presentate

Presentate is a flexible Typst template for professional presentations.

- **Zero-Jitter**: Transitions are engineered for perfect pixel-alignment.
- **Mapping**: Explicit role assignment for heading levels.

Theme Rationale

Testing what happens when content has more levels than the mapping.

2 1. Mapped Section (L1)

2.1 1.1 Mapped Subsection (L2)

Observation

Level 1 is mapped to **Section**. It creates a transition slide.

2 1. Mapped Section (L1)

2 1. Mapped Section (L1)

2.1 1.1 Mapped Subsection (L2)

Observation

Level 2 is mapped to **Subsection**. It appears in the navigation.

1.1.1 Unmapped Heading (L3)

Invisible Level 3

Level 3 is **NOT** mapped.

- It does not trigger a transition.
- It does not appear in the navigation bar.
- It is hidden from the slide body by default.
