The Split Theme

Dual-column header for structural awareness

    1.2. Transitions

Theme Philosophy

The **Split** theme offers a dual-column header:

- **Left side**: Displays the sections.
- **Right side**: Displays subsections of the current section.

1. Introduction
1.1. Theme Philosophy
1.2. Transitions

Transitions

Integrated transition slides provide a roadmap between sections and subsections, helping the audience stay oriented.

2. Configuration

- 2.1. Navigation Style
- 2.2. Layout

2. Configuration

2.1. Navigation Style

2.2. Layout

Navigation Style

Toggle between two modes:

- `navigation-style: "all"`: Shows all siblings (Copenhagen style).
- `navigation-style: "current"`: Shows only the active context (Cambridge style).

2. Configuration

2.1. Navigation Style

2.2. Layout

Layout

Customize the header proportions using `header-columns` (e.g., `(2fr, 1fr)`) and alignments (`section-align`, `subsection-align`).

3. Conclusion

3.1. Summary

Summary

Perfect for professional talks with a clear hierarchical structure.

```
#import "@preview/presentate:0.2.3": split, pause
#import split: template, slide

#show: template.with(
  title: [My Presentation],
  primary: rgb("#003366"),
)

#slide[ Hello World! ]
```
