

# The Split Theme

---

*Dual-column header for structural awareness*

David Hajage | 2026-01-23

# **1. Introduction**

1.2. Transitions

# 1. Introduction

## 1.1. Theme Philosophy

## 1.2. Transitions

## 1.1. Theme Philosophy

The **Split** theme offers a dual-column header:

- **Left side:** Displays the sections.
- **Right side:** Displays subsections of the current section.

# **1. Introduction**

1.1. Theme Philosophy

**1.2. Transitions**

## 1.2. Transitions

Integrated transition slides provide a roadmap between sections and subsections, helping the audience stay oriented.

## 2. Configuration

2.1. Navigation Style

2.2. Layout

## 2. Configuration

### 2.1. Navigation Style

### 2.2. Layout

## 2.1. Navigation Style

Toggle between two modes:

- `navigation-style: "all"`: Shows all siblings (Copenhagen style).
- `navigation-style: "current"`: Shows only the active context (Cambridge style).

## 2. Configuration

2.1. Navigation Style

2.2. Layout

## 2.2. Layout

Customize the header proportions using header-columns (e.g., (2fr, 1fr)) and alignments (section-align, subsection-align).

## 3. Conclusion

### 3.1. Summary

## 3. Conclusion

### 3.1. Summary

## 3.1. Summary

Perfect for professional talks with a clear hierarchical structure.

```
#import "@preview/presentate:0.2.3": split, pause
```

```
#import split: template, slide
```

```
#show: template.with(  
  title: [My Presentation],  
  primary: rgb("#003366"),  
)
```

```
#slide[ Hello World! ]
```
