I.i Theme Overview

This theme provides a persistent sidebar (left or right) containing a progressive outline of your presentation.

The presentation title is automatically displayed at the top of the sidebar for better branding.

I.ii Dynamic Tracking

The sidebar automatically tracks your progress through the document. Items are highlighted based on your current position, and the transition engine provides a full roadmap when switching sections.

II.i Sidebar Placement

You can control the placement and size of the sidebar:

- side: "left" or "right".
- width: Percentage or fixed length (default 22%).

III.i Colors & Fonts

Customize colors (sidebar-color, active-color, text-color) and typography (text-font, text-size) globally.

All elements, including the sidebar entries, scale proportionally.

IV.i Summary

The Sidebar theme is ideal for long presentations where the audience needs constant structural context.

```
#import "@preview/presentate:0.2.3": sidebar, pause
#import sidebar: template, slide
```

```
#show: template.with(
  title: [My Presentation],
  side: "left",
)
```

```
#slide[ Hello World! ]
```
