

The Minimal Theme

Content-first design with smart transitions

David Hajage 2026-01-23

1 Introduction

- 1.a Theme Philosophy
- 1.b Transitions

1 Introduction

1.a Theme Philosophy

1.b Transitions

1.a Theme Philosophy

The **Minimal** theme is designed for presenters who want zero distractions.

There are no persistent headers, sidebars, or footers. The entire slide is your canvas.

1 Introduction

1.a Theme Philosophy

1.b Transitions

1.b Transitions

Despite its simplicity, it fully integrates the **Unified Transition Engine**.

Roadmap slides appear automatically between sections, providing context without cluttering your content slides.

2 Features

- 2.a Full-screen Focus
- 2.b Dynamic Titling

2 Features

- 2.a Full-screen Focus
- 2.b Dynamic Titling

2.a Full-screen Focus

By removing all navigation elements, this theme provides the maximum possible area for your text, images, and diagrams.

2 Features

- 2.a Full-screen Focus**
- 2.b Dynamic Titling**

2.b Dynamic Titling

With `auto-title: true`, your headings automatically become slide titles, keeping your code clean and your slides consistent.

3 Customization

3.a Hooks Support

3 Customization

3.a Hooks Support

3.a Hooks Support

You can still use hooks to create custom transition slides:

```
#show: template.with(  
  on-section-change: (h) => {  
    empty-slide(fill: black)[ #h.body ]  
  }  
)
```

4 Conclusion

4.a Summary

4 Conclusion

4.a Summary

4.a Summary

Minimal is the “clean slate” theme of Presentate.

```
#import "@preview/presentate:0.2.3": minimal
#import minimal: template, slide

#show: template.with(
  title: [My Presentation],
)

#slide[ Focus on what matters. ]
```
