

Motion-tags

How to use it?

```
#motion(s => [  
  // your content  
  #tag(s, "name", [Hello, World!])  
],  
hider: hide, // your hiding function  
controls: (  
  // an array of rules for displaying each steps  
  "name.start",  
)  
)
```

Example 1: Using apply

Hello, Presentate user.

Example 1: Using apply

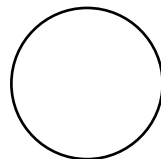

Hello, Presentate user.

Example 1: Using apply

Hello, **Presentate** user.
