The Minimal Theme

Content-first design with smart transitions

David Hajage 2026-10-17

Introduction

Theme Philosophy

Transitions

Introduction

Theme Philosophy

Transitions

Theme Philosophy

The **Minimal** theme is designed for presenters who want zero distractions.

There are no persistent headers, sidebars, or footers. The entire slide is your canvas.

Introduction

Theme Philosophy

Transitions

Transitions

Despite its simplicity, it fully integrates the **Unified Transition Engine**.

Roadmap slides appear automatically between sections, providing context without cluttering your content slides.

Features

- Full-screen Focus
- Dynamic Titling

Features

- Full-screen Focus
- Dynamic Titling

Full-screen Focus

By removing all navigation elements, this theme provides the maximum possible area for your text, images, and diagrams.

Features

- Full-screen Focus
- Dynamic Titling

Dynamic Titling

With `auto-title: true`, your headings automatically become slide titles, keeping your code clean and your slides consistent.

Customization

Hooks Support

Customization Hooks Support

Hooks Support

You can still use hooks to create custom transition slides:

```
#show: template.with(
  on-section-change: (h) => {
    empty-slide(fill: black)[ #h.body ]
  }
)
```

Conclusion

Summary

Conclusion
Summary

Summary

Minimal is the “clean slate” theme of Presentate.

```
#import "@preview/presentate:0.2.6": *
#import themes.minimal: template, slide

#show: template.with(
  title: [My Presentation],
)

#slide[ Focus on what matters. ]
```
