Motion-tags

How to use it?

```
#motion(s => [
    // your content
    #tag(s, "name", [Hello, World!])
  ],
  hider: hide, // your hiding function
  controls: (
    // an array of rules for displaying each steps
    "name.start",
  )
)
```

Example 1: Using `apply`

Hello, Presentate user.

Example 1: Using `apply`

Example 1: Using `apply`

Hello, **Presentate** user.

Example 2: `revert`

A Normal Circle.
