Presentate Demo

Presentation with Extensible Package Integrations

@pacaunt | 2026-10-12

1 Quick Start

Import the Package

To follow this demo, Simply import Presentate from Typst Universe and set the theme:

```typst
#import "@preview/presentate:0.3.0": *
#import themes.progressive-outline: *
#show: template
```

Then, all functionality becomes available.

2 Simple animations

Pause, Meanwhile, Jump

You can incrementally show content with `#pause`.

`#meanwhile` is used to show something in between.

You will see *me* in the first subslide because of `#jump(1)`.

Pause, Meanwhile, Jump

You can incrementally show content with `#pause`.

This text appears later.

`#meanwhile` is used to show something in between.

Such as this comment.

`#jump(index)` is used to ‘jump’ to the specified index.

You will see *me* in the first subslide because of `#jump(1)`.

Uncover, only
